

Aryan Mundra

Software Developer (SDE-1) | Java Backend Developer

+91-9699432001 | am.aryanmundra@gmail.com | Mumbai, India | linkedin.com/in/aryan-mundra | github.com/aryan-mundra

SUMMARY

Backend Software Engineer at **Jio Platforms Limited**, contributing to India's largest telecom app handling **1.5M+ recharges daily**. Skilled in system design, distributed systems, and building high-traffic microservices with **Java, Spring Boot, Redis, Kafka, and Kubernetes**. Proven record of improving API performance, scalability, and concurrency while building resilient, fault-tolerant backend architecture following SOLID principles.

PROFESSIONAL EXPERIENCE

Jio Platforms Limited · Software Developer 1 (SDE-1)

Sep 2023 · Present

- **Built and maintained backend APIs for MyJio's Recharge & Payments** - a distributed system processing 1.5M+ transactions/day, applying system design best practices for reliability.
- **Reduced recharge workflow latency by 55%** (900 ms → 400 ms) by redesigning service logic and implementing a Redis caching strategy, directly improving conversion rates.
- **Improved B2B and S2S microservices** using SOLID principles for partner integrations and add-on packs, enabling better scalability and fault tolerance.
- **Implemented Kafka-based event-driven flows**, decoupling tightly-bound services and enabling real-time updates across MyJio Dashboard.
- **Profiled and tuned SQL/Oracle queries**, cutting plan-fetch response times by 40% and reducing DB load during peak traffic hours.
- **Added API authentication and rate limiting** at the API gateway layer using OAuth 2.0 and Spring Security filters, preventing abuse and ensuring security compliance.
- **Built monitoring dashboards and alerting systems** over application logs, reducing undetected production failures by 60% and enabling faster incident response.
- **Deployed and managed microservices on OpenShift/Kubernetes** with load balancing, CI/CD pipelines, and concurrency tuning for high-traffic reliability.

EDUCATION

Georgia Institute of Technology

Masters in Computer Science | **CGPA: 3.3 / 4**

Aug 2024 · Sep 2026

VIT, Mumbai

Bachelor of Engineering (B.E.) in Computer Science Engineering | **CGPA: 9.35 / 10**

Aug 2019 · Jun 2023

TECHNICAL SKILLS

Languages	Java, Python, SQL, JavaScript
Frameworks	Spring Boot, Spring Security, Hibernate, JPA, Django, Apache Kafka
Databases	Oracle, MySQL, Redis
DevOps / Cloud	Kubernetes, OpenShift, Docker, CI/CD Pipelines, AWS (EC2, S3), Git

RESEARCH PUBLICATIONS

Depression Detection using CNN and LSTM Model · **Accepted in IEEE GCITC 2023** [See paper](#)

PAWnnect: IoT-ML Driven Pet Monitoring · **Accepted in Springer ICTSES 2023** [See paper](#)

ML for Social Media Mental Health Analysis · **Accepted in Springer HUMAN 2024 Conference** [See paper](#)

PROJECTS

Job Portal Web Application

Tech: Java, Spring Boot, Spring Security, MySQL, Thymeleaf, JPA

- Full-stack app with role-based dashboards (Admin, Employer, Candidate), authentication, and job management handling 1,000+ listings.
- Built search/filter with pagination and RESTful APIs for job posting, application tracking, and user profile management.

Jewelxa · Jewellery E-commerce Platform

Tech: Django, Python, MySQL, AWS EC2, S3

- E-commerce platform with product listings, user reviews, order tracking, and admin inventory dashboard; deployed on AWS with 99.5% uptime.
- Integrated secure checkout with payment gateway and optimized image delivery using S3 CDN.

INTERNSHIP EXPERIENCE

Vidyalankar Institute of Technology · Web Developer Intern

Jun 2021 · Aug 2021

- Developed a **Canteen Food Ordering System** using Java Spring Boot, HTML, CSS, and JS to digitize order management, serving 500+ daily users.

SNT Creation · Web Developer Intern

Jan 2021 · Mar 2021

- Built and deployed an **e-commerce site on AWS (EC2, S3)** using Django and Python with authentication, cart, and secure checkout flows.
